

Description

Are you an organized, detail-oriented? Are you a collaborative fabricator/welder and interested in developing machining skills? Are you excited to join a team of world-class professionals?

Turner Exhibits is a custom design and fabrication firm, driven by ideas and a culture of collaboration. Innovation and creativity are at the heart of our work. The diverse perspectives of your future colleagues and clients will inspire and challenge you to be extraordinary as you create transformational and memorable experiences. We partner with technology pioneers, nationally recognized leaders in the world of design and construction, discerning homeowners, and cultural institutions to develop custom solutions that are expertly crafted, durable, and safe.

Your Role At A Glance

Turner Exhibits Production Team specializes in the design, fabrication, and installation of custom kinetic architecture features and permanent exhibits for corporate, non-profit, and private clients across commercial and residential sites throughout North America and internationally. This position is a key member of the Production Team, classified as full-time, hourly, and reports directly to the Production Manager.

In Your New Role, You Will

- Read and interpret design and technical shop drawings.
- Select the appropriate tool(s) and process(es) from a variety of electrical and manual equipment to complete fabrication tasks.
- Cut and layout parts to achieve quality results that meet design and performance criteria.
- Produce machine parts to tight tolerances
- Produce appearance-grade, accurate, and structurally sound welds.
- Work in a professional manner and maintain equipment properly to ensure the safety of yourself and others.
- Collaborate with others in the Production, Design, and Project Management teams to successfully deliver complex projects from planning to completion.
- Seek out and utilize the expertise of your peers and management.

What You Will Need To Succeed

- Be able to read and interpret technical drawings.
- Have basic tool skills (i.e. angle grinder, orbital, bandsaw, etc.).
- Have forklift operation experience.
- Have prior fabrication/layout building experience.
- GTAW experience required and FCAW/GMAW experience preferred.
- Interest in developing machining skills (manual mill & lathe work)
- Work safely, accurately, and efficiently to achieve high levels of quality.
- Contribute productively in a team environment.

- Have the capability and desire to communicate effectively with a diverse set of individuals within and outside of Turner Exhibits.
- Enjoy learning new skills and desire to continuously improve.
- Be willing to travel.
- Pass a TE (Turner Exhibits) administered weld/layout test.

Additional Requirements

- Valid WA state driver's license and is insurable.
- Valid WA state automobile liability insurance.
- Ability to safely lift 50 pounds.
- Ability to work in Canada (no felony arrest record).
- Willingness to participate in customer-required drug testing.
- WABO and AWS certifications are welcome, but not required. Must be willing to test for WABO certifications.

Benefits

In addition to a dynamic and creative culture, Turner Exhibits provides a generous benefits package that includes paid time off, (10) paid holidays, employer-supported health and dental plans, SIMPLE IRA match, a company-wide bonus program, and selected support for continuing education. Turner Exhibits is committed to total compensation practices that are fair, competitive, and reflect internal pay equity. At the time of posting this job, the hourly rate for this position in Lynnwood, Washington is between \$24/hr. and \$28/hr DOE. Total compensation offers are based on experience, education, and internal pay equity between employees with like-type roles and responsibility.
